In case of skin irritant, the problem will be solved by simply cleaning the area and with the recommended wipes and the use of some medications. A veterinarian can prescribe other medications according to need, such as anti-inflammatories, glucocorticoids, antibacterial, antifungal and antiviral, and hormone replacement therapy. Canine herpesvirus: Infection by herpesvirus canines is a serious and fatal disease that occurs mainly in the puppies. To keep the dog's vagina clean and avoid a greater infection, your veterinarian will suggest a typical medication, which can be used twice a day. The treatment is based on the specific cause of the condition of your pet. A professional Vet visit is always recommended, even in a minor health problem. For some causes of inflammation of the vagina, the surgery will be the treatment option. Female dogs often observe the swollen vag of their hairy friend. 3. If your dog has a blow on its private area or swelling. 10. Some of the causes of the swelling in the private canine area can be less, but some may be dangerous and can lead to your puppy to serious health problems. The timely diagnosis of the cause and real treatment can prevent their canine from future complication. According to pet skill and veterinarians, a female non-paid dog develops the estrus cycle approximately three to four weeks once or twice a year. Urinary or urethral incontinence: Urinary or urethral incontinence refers to the loss of the voluntary control of the mice. A dog suffering from urinary or urethral incontinence shows inflammation in the genitals. Some are considered minor and can be treated with adequate care and medications. 13.
